Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on **1-15-03** has been entered.
2. Claims 3 and 17-20 are pending and under consideration.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 3 and 17-20 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the claimed method wherein the proliferated transformed tumor cells produced ex vivo in claim 3 or claim 17 are directly administered into a tumor of a subject to treat the tumor cells of the tumor in the subject, does not reasonably provide enablement for transplanting the proliferated transformed tumor cells at any site in the subject. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

Response to Arguments

Applicant's arguments filed 1-15-03 and 11-13-02 have been fully considered but they are not persuasive to obviate all the rejections. As noted in the advisory

Art Unit: 1632

action, that the issues discussed in after final response were discussed in the previous office actions and that no new arguments were presented. In the response filed on 1-15-03, applicants have attached a paper published in 2002 by Goto et al in J. Immunotherapy. It is noted that this art is a post filing art and therefore it can provide enabling support for the claimed invention if it used the method taught in the specification. In the instant case, however, claimed invention is a method of ex vivo therapy whereas the method taught in Goto et al and also in the Ju et al article (Gene Therapy 2000, cited in the after final response of 11-13-02) is of gene therapy wherein a adenivrial vector is administered to an animal by intra-peritoneal injection. Therefore, the methods in the instant application and the cited art are not the same and cannot be compared. Additionally, the adenoviral vector of Goto et al was modified by addition of IL-1 leader sequence and such modification allows more efficient secretion of bioactive IL-18. The specification does not teach any such modification. Additionally, the vector taught in Goto et al and the instant specification are also very different, which again indicates that the method of Goto et al was not practiced following the method taught in the specification. While the antitumor effects of IL-18 is not contested, the issue is the provision of IL-18 in sufficient amount to any tumor any where in an animal by the cells transformed with IL-18 expression vector taught in the specification by any routine of administration. It is reiterated that a scope of enablement for direct administration of the cells to the tumor has been set forth which indicates that IL-18 antitumor effects are not contested.

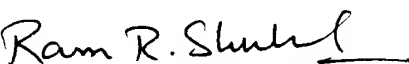

Action Is Final, First Action Following Request for Continued

Examination under 37 CFR 1.114 All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, THIS ACTION IS MADE FINAL even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a) A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
